## **WELLPOINT ANNOUNCES RELEASE DATE FOR FIRST MODULE WITHIN NEW INTEGRATED WELL LIFE CYCLE PORTFOLIO**

CALGARY, Alberta, June 09, 2005 – WellPoint Systems Inc. ("WellPoint") (TSX-V:WPS) today announced the pending release of WellPoint Rig Scheduler (WRS), the first in a series of modules that will make up the company's much anticipated Requesting-Tracking-Scheduling (RTS) portfolio. Scheduled for general availability on June 16<sup>th</sup>, 2005, WRS represents the second Microsoft Axapta-based product to be released by the company in the past six months. For WellPoint, this Axapta technology foundation represents an integrative development platform that will ultimately serve to shift the onus of application integration from the Oil & Gas company to the technology itself.

Designed primarily to optimize the scheduling process, WRS provides a flexible framework that captures the entire range of oil well and rig activity. The data driven color configuration allows multiple levels of user to manage all of the tasks associated with the movement of locations. WRS is completely configurable by the user and can be interfaced to any external application. The application also provides the capacity to do comprehensive filtering and perhaps most importantly of all, the ability to do flexible, detailed reporting.

"The release of WRS reaffirms WellPoint's commitment to developing products that are designed with our customers' current and future requirements in mind," says Tom Mawhinney, Vice President of Sales & Marketing for WellPoint Systems. "Oil & Gas companies have long been asking for a modular, integrated approach to developing software applications and we are very fortunate to possess both the vertical expertise and the technological capability to be able to deliver on this request."

### **About WellPoint Systems Inc.**

WellPoint Systems provides premier software and related services for managing Upstream, Midstream and Financial Oil & Gas operations. Aligning tightly with Microsoft Corporation, WellPoint is the only Independent Software Vendor (ISV) and Microsoft Business Solutions (MBS) partner in the Oil & Gas sector. It is breaking new ground with the creation of a more comprehensive, integrated Oil & Gas software suite based on existing Microsoft ERP technology that utilizes state-of-the-art Axapta® and .NET architecture.

Founded in 1997, Calgary based WellPoint Systems also has operations in Houston, Texas through its subsidiary company, WellPoint Systems, Inc.

WellPoint is publicly traded on the TSX Venture Exchange under the symbol WPS.
