Systems Inc.**

Energy Broker

WellPoint Energy Broker (ENB) is an integrated oil and gas marketing solution focused on mid-stream companies. ENB provides dynamic and innovative marketing, scheduling and nomination software designed to manage complex price scenarios, streamline supply / demand analysis, expedite contract and nomination confirmations, and provide detail administrative, management and executive financial reports.

ENB PROVIDES:

- Forecast vs. Actual analysis and infrastructure to support risk reporting:
 - Pricing analysis with online 'what if' scenario tools
 - Pricing and volumetric forecasting with 'mark to market reporting'
 - Credit worthiness with integrated accounts receivables
- A single system interface to your marketing, trading and scheduling resources for all oil, gas and NGL transactions
- A robust reporting architecture for your management and financial accounting team
- The building blocks for modeling complex pricing scenarios utilizing mathematical functions, price floors and ceilings, associated contracts and other system attributes to construct price formulas
- The detail associated with individual pricing components utilized for flexible configuration and management of Tariffs, Quality, Blending, Storage, Transfer fees, pricing bonuses and adjustments, accounting fees and other charges
- A full suite of settlement documents:
 - Invoicing
 - Producer Statements
 - Net Back
 - NetOut Statements
 - Inventory Valuation

INNOVATIVE TECHNOLOGY AT YOUR FINGERTIPS... AND ON YOUR DASHBOARD

MULTI-COMMODITY

- State of the art marketing, scheduling and settlement of oil purchase, sale and NetOut transactions
- Natural Gas Liquid (NGL) pricing and settlement by user defined product mix
- Gas scheduling and settlement for produced and residue volumes

DATA MANAGEMENT THROUGH IMAGING, ALERTS AND WORKFLOW

- Operational and Financial concerns are communicated to specific individuals via targeted and timely electronic alert notifications
- Electronic Contract and nomination confirmations are managed with built-in Document Management imaging and storage tools
- Electronic Price Uploads are utilized to capture published prices and support complex pricing scenarios
- Pre-Deal Confirmation analysis utilizing 'what if' pricing, supply and delivery analysis scenarios
- Detail margin and trend analysis at a commodity and company level

MULTI-CURRENCY

- Contracts are managed in the currency of the source agreement
- Transactions are managed in the currency basis of the trading, scheduling and transportation partners
- Corporate entities or subsidiaries can consolidate transactions using a single currency rate and basis
