Midstream Oil & Gas Business Analyst

Our Business Analysis team has an opportunity for a midstream oil and gas Business Analyst. This role is responsible for providing business analysis, subject matter, and product and system expertise to all internal teams throughout the software development life cycle.

Responsibilities:

- Work with the Products & Technology (P&T) teams to develop the solution scope throughout the software development cycle
- Perform business requirements elicitation and analysis
- Analyze requirements with team for system impact
- Create specifications for enhancements, development and problem requests
- Author use cases and perform functional and QA testing
- Maintain and modify documentation with assistance from P&T team (on-line help, user & set up guides, release notes)
- Support the P&T team with miscellaneous projects as required
- Support the Sales, Marketing, Services and Support teams as required

Qualifications:

Preference will be given to candidates with relevant oil and gas industry experience and domain knowledge.

- 5-10 years of oil and gas midstream marketing, Canadian and U.S. crude oil and natural gas
- O&G upstream and/or midstream accounting experience
- Experience with the software development process
- Experience with an ERP and/or Microsoft Dynamics AX
- Strong written and verbal communication skills
- Ability to work in a fast paced environment across multiple teams
- Related diploma/degree or equivalent work experience is required

Interested candidates are invited to forward a resume, in confidence to:
