

WellPoint Systems Passes Key Milestone on Path to Achieving Certification for Microsoft Dynamics Accreditation

CALGARY, Alberta – November 6, 2008 – WellPoint Systems Inc., (“WellPoint” or the “Company”) (TSX-V:WPS), a leading provider of software and solutions to the energy industry, today announced that its Energy Financial Management (EFM) software version 3.0.2.0 has passed the Software Solution Test for Microsoft Dynamics, which is a major requirement for ‘Certified for Microsoft Dynamics[®]’ status. WellPoint’s EFM solution is the only Oil & Gas Financial solution built on Dynamics AX to achieve this milestone.

Certified for Microsoft Dynamics is Microsoft’s highest standard for partner-developed software. This certification represents a significant step forward in elevating the standard for partner-developed software solutions for industry-specific business applications. Solutions with a successful software test have demonstrated both high development quality and compatibility with the Microsoft Dynamics product. VeriTest, a service of Lionbridge, performed independent and rigorous testing on the solution’s integration with Microsoft Dynamics. WellPoint has also earned the Microsoft Certified Partner designation with the Independent Software Vendor (ISV) Competency.

“By requiring the software solution to meet our highest standards, Microsoft is assuring customers that these certified solutions work with their investments in Microsoft Dynamics,” said Doug Kennedy, vice president, Microsoft Dynamics Partners. “Microsoft congratulates WellPoint on the software test results and wishes it success in earning the Certified for Microsoft Dynamics designation.”

WellPoint Energy Financial Management was designed with the complex needs of oil & gas companies in mind, offering a single standard global solution for worldwide financial management and reporting requirements. Financial solutions from WellPoint Systems offer a fresh approach to corporate financial management with a best-in-breed solution focused on industry requirements for integration and flexibility. The result is an innovative solution capable of exceeding the financial and accounting requirements of the industry, including authorization for expenditure management, cost center controls, division of interest and joint interest billing.

“WellPoint has always been committed to software excellence, and passing the Software Solution Test for Microsoft Dynamics is a reflection of that commitment,” said Rick Slack, COO of WellPoint. “WellPoint’s mission is to address the unique needs of the Energy Industry, and EFM is the product to help us meet that goal.”

About Microsoft Dynamics

Microsoft Dynamics is a line of financial, customer relationship and supply chain management solutions that helps businesses work more effectively. Delivered through a network of channel partners providing specialized services, these integrated, adaptable business management solutions work like and with familiar Microsoft software to streamline processes across an entire business.
